Summary

AI and ML Engineer with full stack development experience in building scalable web applications and data-driven systems. Skilled in machine learning, backend development, API integration, and CI/CD pipelines. Delivered multiple solutions through freelancing and hackathons with a focus on performance, usability, and scalability.

Experience

Freelance Full Stack and AI/ML Developer

2025

- Delivered more than five end-to-end applications across ERP, education, and healthcare domains, improving system efficiency by up to 30%.
- Managed the complete development lifecycle, including requirement analysis, development, and deployment.
- Collaborated with clients to convert business requirements into scalable technical solutions.

Web Development Intern | BrainyBeam Info-Tech Pvt. Ltd., Ahmedabad

(Jul 2026 – 15 Days)

- Learned MERN Stack development, including React.js, Node.js, Express.js, and MongoDB.
- Built a responsive E-Commerce web application with product listing, cart, and user authentication.
- Gained hands-on experience in REST API development, database integration, and full-stack application workflow.

Projects

[AI Farmer Guidance System](#)

- Engineered an ML-driven solution for crop recommendation and disease detection, improving decision accuracy.
- Integrated multilingual voice interaction leveraging speech recognition models.
- Generated real-time insights through large language model integration.

[Civic AI Platform \(Road Damage Detection\)](#)

- Designed a computer vision system to detect road damage such as potholes and cracks.
- Utilized Python, YOLO, and OpenCV for image processing and real-time detection.
- Built backend services with FastAPI and integrated a web interface for monitoring and analysis.

CI/CD Pipeline for Automated Error Resolution (Hackathon Project)

- Designed a CI/CD pipeline to detect and resolve GitHub commit errors during code integration.
- Established version control workflows to create separate branches, fix issues, and push updated code.
- Automated build, testing, and deployment using GitHub Actions, Node.js, and Docker.

Skills

Programming: Python, Java, JavaScript, TypeScript

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, SQL, Django

Databases: PostgreSQL, MongoDB, Firebase

AI and ML: Agentic-AI, AI- Agents Building, AI model fine-tuning

Tools: Git, GitHub, Docker, CI/CD, REST APIs, Microservices

Education

Shantilal Saha Engineering College

2023 – Present

Bachelor of Engineering in Information Technology

CGPA: 9.13

Achievements

- Participated in national-level hackathons, including RIFT (Pune) and Adani Hackathon.
- Developed a CI/CD pipeline solution during a hackathon to automate deployment workflows.
- Demonstrated strong problem-solving and rapid prototyping skills.
